

HEALTH SCREENING ASSESSMENT – (MOHAP)

01st JULY 2025

Dear Parents,

The Ministry of Health and Prevention (MOHAP) has recommended the following specific Health Screening assessment for prevention of dental diseases in school students.

1. General dental check and treatment planning
2. Topical Fluoride Application to prevent dental decay (for upper and lower teeth)

Kedar Dental Centre, Sharjah has consented to get the checkup and the topical fluoride treatment done at their center at a promotional charge of AED 110 per child.

The required certification will be provided for the same to submit at the school.

This health screening is sponsored by Kedar Dental Clinic
