Month: October

Theme: Our Astonishing Oceans

1. Why do we need to protect oceans from pollution?
2. Why do beaches have sand on them?
3. Why does the water at Al Mamzar beach glow at night?
4. Why are dolphins not fish?
5. Why do oceans have salty water?
6. Why do whales and dolphins come to the surface to breathe?
7. Why do some plants, like seaweed, grow in the ocean but not in a garden?
8. Why do fish live in schools (groups)?
9. Why do octopuses live in caves and cracks in the ocean?
10. Why do shells have tiny holes or cracks in them sometimes?

Month: October

Theme: Our Astonishing Oceans

1. Why do ships float on the ocean and not sink?
2. Why is plastic pollution a significant problem for oceans?
3. Why do crabs walk sideways?
4. Why do some fish live deep in the ocean while others live near the surface?
5. Why do some fish change colours to blend in with the ocean?
6. Why do sea turtles lay their eggs on beaches instead of in the ocean?
7. Why do starfish have five arms?
8. Why do jellyfish sting?
9. Why do coral reefs provide shelter for fish?
10. Why do sea otters float on their backs?
11. Why do seashells help protect sea animals from predators?
12. Why do penguins huddle together?
13. Why do stingrays stay close to the ocean floor?
14. Why do sea urchins have spines?
15. Why do whales spout water from their blowholes?

Month: October

Theme: Our Astonishing Oceans

1. Why is the Arctic Ocean colder than the other oceans?
2. Why are oceans important for regulating the Earth's climate?
3. Why do some ocean animals, like whales, migrate long distances?
4. Why do octopuses squirt ink when they feel scared?
5. Why do coral reefs have such a diverse range of species?
6. Why is ocean acidification a concern for marine life?
7. Why do Beluga whales live in the Arctic Ocean?
8. Why do tides occur in the ocean?
9. Why are mangroves important to coastal ecosystems?
10. Why do some fish, like clownfish, form symbiotic relationships with sea anemones?
11. Why do ocean temperatures vary between the five oceans?
12. Why are ocean currents critical for global weather patterns?
13. Why do some marine animals use bioluminescence?
14. Why do some sea turtles return to the same beaches to lay their eggs?
15. Why is the ocean considered a vital source of food for humans?
16. Why are seagrass beds important for marine life?
17. Why are some seashells smooth while others are rough?
18. Why do sea anemones have tentacles?
19. Why does the Pacific Ocean cover more than one-third of Earth's surface?
20. Why do seals have flippers?
