

IBN SEENA ENGLISH HIGH SCHOOL

Month: November

Theme: Birds

1. Why do birds have different feeding habits, like seed-eating versus insect-eating?
2. Why do woodpeckers peck on trees?
3. Why do birds have different types of claws?
4. Why do owls have big eyes?
5. Why do birds preen their feathers?
6. Why do seagulls squawk so loudly?
7. Why do birds lay eggs with different colours and patterns?
8. Why do birds have different-shaped beaks?
9. Why do flamingos have long legs?
10. Why do the Falcons have a hooked beak?

IBN SEENA ENGLISH HIGH SCHOOL

Month: November

Theme: Birds

1. Why do hummingbirds hover in place while feeding on nectar?
2. Why do flamingos have pink feathers?
3. Why do birds have hollow bones?
4. Why is the structure of a bird's bone different from that of reptiles or mammals?
5. Why do some species of geese migrate thousands of miles each year?
6. Why are claws important for a bird's feeding habits?
7. Why do African grey parrots have such advanced vocal mimicry skills?
8. Why do kingfishers have specialized beaks for catching fish?
9. Why do birds swallow stones or grit?
10. Why have some birds, like ostriches and emus, lost the ability to fly?
11. Why do seagulls fly in circles?
12. Why do falcons have such keen eyesight?
13. Why do some birds have long wings while others have shorter, more rounded wings?
14. Why do some birds have colorful or distinctive beaks?
15. Why do bird migration routes follow specific paths across continents?

IBN SEENA ENGLISH HIGH SCHOOL

Month: November

Theme: Birds

1. Why do many birds sleep standing up or perched on one leg?
2. Why do some birds build elaborate nests while others barely make any nests?
3. Why do some birds fly in a V-formation during migration?
4. Why do some birds have brightly coloured feathers while others are camouflaged?
5. Why do woodpeckers create cavities in trees?
6. Why do birds migrate at specific times of the year?
7. Why do migratory birds have larger fat reserves before migration?
8. Why do robins use mud and grass to construct their nests?
9. Why do birds like penguins thrive in extreme cold while others prefer tropical climates?
10. Why do peregrine falcons achieve such high speeds during dives?
11. Why do larger birds of prey tend to have much longer lifespans than smaller birds?
12. Why do birds like albatrosses and eagles soar for long distances without flapping their wings?
13. Why do some birds form flocks while others are solitary?
14. Why do eagles have strong talons and beaks?
15. Why do seagulls follow fishing boats?
16. Why do birds lay eggs instead of giving live birth like mammals?
17. Why do perching birds' feet lock automatically when they sleep?
18. Why are some birds, like hummingbirds, adapted for consuming liquids rather than solids?
19. Why do migratory birds often sleep less during migration periods?
20. Why do many birds use camouflage or nest protection strategies to safeguard their eggs during incubation?
